

BREACH ASSESSMENT

Mossé Security offers an enterprise-wide forensic sweep called Breach Assessment. Through this service we detect threat actors that security defences have failed to stop, brief business owners on weak points in their systems, and then design a comprehensive cyber security plan. Call or email us today to begin this comprehensive security service.

OVERVIEW

Breach Assessment is a unique enterprise-wide forensic analysis Mossé Security offers in order to assist business owners with implementing a comprehensive cyber security plan based on the results of the analysis.

Breach Assessment allows us to advise on the effectiveness of an organization's existing systems regardless and independently of any secure measures in place. Our advisement further assists organisations in making informed decisions regarding the allocation of additional security resources.

We ensure ourselves that our clients learn and achieve a deeper understanding of the increasingly sophisticated computer threats they face, at the same time offering them mitigation and prevention strategies to hedge any damage.

Recent security threats have incrementally grown in their stealthiness and aggressiveness. So much so, that organisations are unaware of breaches until the intruder has wreaked significant damage. As our client rest assured that you will be fully briefed, thus enabling key decisions to be made regarding future security spending.

MOSSÉ SECURITY

- **Industry Reputation:** Mossé Security has been operating since 2010 and has provided service and learning programmes to numerous top private sector companies and government entities worldwide.
- **Expertise:** Mossé Security provides incident response services to hundreds of organisations. We help our clients detect, respond, and fight back continual targeted threats.
- **Exposure:** Mossé Security responds to hundreds of cyber incidents per year. This allows us to see how cyber threat actors are targeting specific industries and regions of the world. Thus, our scope allows us to effectively discover and stop attackers on networks that traditional security defenses miss.
- **Trusted Deliverables:** Mossé Security's services are delivered with the reliability and professionalism expected of a company in our field. Our services are prompt and tailored to the client's specific needs.

BENEFITS:

Strategy:

A Breach Assessment helps executives understand the threats targeting their systems. With that knowledge, they can better assess their security risks and optimise IT security spending.

Breach Readiness:

Breach Assessment uncovers gaps in the client's incident response processes. Mossé Security can then further advise on how to better prepare for potential future breaches.

Due Diligence:

Breach Assessment will help you evaluate whether there may be active threat actors on your network that bypassed security systems, and how to improve defenses going forward.
