

MS GUARD TECHNOLOGY

MS Guard Technology provides organisations with advanced insights into the security posture of Microsoft Windows workstations and servers by identifying critical vulnerabilities. MS Guard scans an unlimited number of machines at absolutely no charge, no strings attached, no-catch. Contact us today to begin this service.

OVERVIEW

Mossé Security Guard Technology ("MS Guard") is a cutting-edge technology that empowers organisations worldwide to identify their security posture.

Once MS Guard is employed, the results will provide organisations with detailed security recommendations to harden the existing IT systems without the need to engage 3rd party vendors. Organisations use MS Guard to achieve compliance in line with the Australian Cyber Security Centre (ASCS) 'Essential 8' and to scale up current security efforts.

MS Guard helps organisations identify 300+ Microsoft Windows security settings that when these are turned on help:

- Block many of the most common spear-phishing attack payloads
- Minimise the consequences of ransomware attacks
- Defeat many of the top penetration tools
- Prevent adversaries from stealing Windows credentials stored in memory
- Disable dangerous software that is commonly used to execute malware

MOSSÉ SECURITY

- **Industry Reputation:** Mossé Security has been operating since 2010 and has provided service and learning programmes to a number of top private sector companies and government entities worldwide.
- **Expertise:** Mossé Security has delivered hundreds of technical attack simulations and responded to hundreds of security incidents all over the world. This scope and experience make Mossé Security uniquely qualified to offer pertinent and timely security advice to our clients.
- **Trustworthiness:** Our clients consist of multinationals, financial institutions, and governments who trust us with the IT security of their organisations. Our services are delivered with the reliability and professionalism expected of a company in our field.
- **Candid Advice:** We provide comprehensive and frank assessments of all security issues to assist our clients in making timely, informed decisions.

BENEFITS:

Save Money:

MS Guard helps organisations reduce the cost of assessing the security posture of Windows machines in large-scale networks

Improved ROI:

MS Guard enable organisations to increase the return-of-investment (ROI) on endpoint detection and response (EDR) purchases

Future Proofing:

MS Guard positions organisations to significantly reduce the cyber risk of Windows machines by mitigating the most critical vulnerabilities
