MOBILE APPLICATION PENETRATION TESTING

Mossé Security offers Mobile Application Penetration Testing services. Our Certified Consultants can expertly identify all your mobile application vulnerabilities and lay out the impacts and business risk your organisation faces.
Contact us today to begin this comprehensive security service.

OVERVIEW

Mossé Security provides top Mobile Application Penetration Testing as an independent test to identify unknown vulnerabilities. We test all the components that get targeted in mobile applications. Our Certified Consultants employ a combination of automatic tools and manual techniques to simulate realistic attacks that organisations with similar target profiles are currently facing. We often see user roles, password access controls, and privilege escalation as the focus of attacks. Successful completion of these tests ensures strict compliance with industry security standards and legal requirements.

Mossé Security has completed hundreds of successful Mobile Application Penetration Tests for a multitude of organisations throughout Australia. Over the past nine years we've solidly earned the trust of our clients by delivering a highly ethical standard of work, providing consistency with impeccable attention to detail. Our customers know that when we complete a Mobile Application Penetration Test, the in-depth thoroughness with which we perform this work is always above and beyond the commonly used methods.

MOSSÉ SECURITY

- **Reconnaissance:** Mossé Security's consultants dive into the source code to get a thorough understanding of the application's functions, and map out how the application interacts with the backend. The results promotes the ability to plan which vulnerabilities are most likely to be present and exploited.

- **Vulnerability Identify & Analysis:** Mossé Security uses advanced tactics and techniques to discover the vulnerabilities presented throughout the mobile application. As a result of our analysis, we can identify the critical risk levels of the discovered vulnerabilities.

- **Exploitation:** Mossé Security's Certified Consultants rigorously conduct a meticulous combination of standard and sophisticated attacks to exploit the vulnerabilities present. Our detailed process allows us to gain access to the network to gather the stored sensitive information.

- **Comprehensive Reporting:** Mossé Security provides a thoroughly detailed report of all the findings, including any sensitive information accessed. We highlight the risks found and include our expert recommendations for solutions and remediations of the discovered vulnerabilities. We are dedicated to improving your applications security protocols.

BENEFITS:

Expertise:

Mossé Security delivers hundreds of tests using realistic simulation threat actor attacks that organisations with similar target profiles are currently using against organisations

Peace of Mind:

Mossé Security provides high levels of assurances that mobile applications are secure, thus keeping your information and your customers' information secure

Risk Mitigation:

Our comprehensive report allows your organisation to make quick decisions to implement our recommended solutions and remediations
