

OFFENSIVE COUNTERMEASURES

Mossé Security offers highly specialised services to create consequences for the adversaries attacking computer networks. Those services are called the Offensive Countermeasures. When applied correctly, the Offensive Countermeasures can assist organisations recuperate stolen documents and funds, and discourage adversaries from coming back.

OVERVIEW

Offensive Countermeasures is a security strategy that creates consequences for the attackers who hack your computers. We hold the tenet that if resources are not spent on tracking and disrupting the attackers, then we are, by omission, allowing them to try new ways to breach our defences and to come back later to steal even more from us.

At a high-level, Offensive Countermeasures consists of wide range of power instruments such as:

- **Psychological Warfare:** Negatively affecting the attackers' moral to make them reduce or cease their attacks.
- **Cyber Warfare:** Destroying or disrupting the adversaries' IT assets.
- **Economic Warfare:** Discovering how the adversaries are funded, removing their source of income.
- **Information Warfare:** Infiltrating adversary groups and disseminating false information to turn members against each other.
- **Law Enforcement:** Getting the adversaries arrested and prosecuted.

MOSSÉ SECURITY

- **Industry Reputation:** Mossé Security has been operating since 2010 and has provided services and learning programmes to numerous top private sector companies and government entities worldwide. We have helped organisations deal with serious attacks in the most confidential manner.
- **Expertise:** Mossé Security's consultants have manually compromised over 100,000 machines during attack simulations. We are constantly researching and building new and innovative offensive security capabilities that can be used for Offensive Countermeasures purposes.
- **Exposure:** Mossé Security responds to hundreds of cyber incidents per year. This allows us to see how cyber threat actors are targeting specific industries and regions of the world. We are also strategically well placed to understand how organisations can counter high-risk threat actors.
- **Trusted Deliverables:** Mossé Security's services are delivered with the reliability, confidentiality and professionalism expected of a company in our field. Our services are prompt and tailored to the client's specific needs.
