

OFFENSIVE SECURITY STAFF AUGMENTATION

Mossé Security offers Staff Augmentation Services to organisations providing offensive security capabilities in areas typically lacking or challenged. Our Certified Consultants work onsite to deliver ongoing penetration testing and Red Teaming services.

OVERVIEW

Our Mossé Security Certified Security Consultants become integrated as one of your team members in the capacity of providing expert insights and analysis across all areas of offensive security.

We expertly help and assist your organisation with crucial security advice and our Certified Security Consultants are expertly skilled in areas such as penetration testing, vulnerability research, exploit development, malware writing and Red Teaming.

MOSSÉ SECURITY

- **Vulnerability Research & Exploitation:** Finding and exploiting software vulnerabilities.
- **Red Teaming:** Realistic attack simulations using the same techniques, tactics and procedures as the adversaries that target your organisation.
- **Penetration Testing:** Identifying and exploiting vulnerabilities in your organisation's software or network.
- **Security Product Evaluation:** Testing enterprise security products to help you make the right investments and ensure the best protection for your organisation.
- **Vulnerability Scanning:** Using automated tools to identify vulnerabilities at scale, triaging the most important ones, and offering pragmatic advice to uplift cyber defences.

BENEFITS:

Certified Expertise:

Trusting our certified expertise bringing knowledge and insight into offensive security areas.

Convenience:
