

RAPID INCIDENT RESPONSE

Mossé Security offers rapid and thorough incident response services to clients facing security intrusions. Through in-depth digital forensics and reverse engineering analysis, we help clients recover from significant security breaches. Call or email us today to learn more about this vital response service.

OVERVIEW

Mossé Security offers three tiers of Rapid Incident Response Services tailored specifically to the size and industry of your organisation. Upon being retained, we rapidly increase the speed of your intrusion response while training your IT team on best security practices to handle future intrusions as well.

Threat Actors

Amongst the types of threat actors Mossé Security has experience responding to include:

- Ransomware and traditional malware.
- File-less remote access trojans (RATs).
- Malicious insiders and accidents caused by the IT team.
- Persistent attackers that use the client's own insecure configuration of its IT infrastructure to maintain long-term network access and evade detection.

MOSSÉ SECURITY

- **Industry Reputation:** Mossé Security has been operating since 2010 and has provided service and learning programmes to numerous top private sector companies and government entities worldwide.
- **Trustworthiness:** Our clients consist of multi-nationals, financial institutions, and governments who trust us with the IT security of their organizations. Our services are delivered with the reliability and professionalism expected of a company in our field.
- **Candid Advice:** We provide comprehensive and frank assessments of all security issues to assist our clients in making timely, informed decisions.
- **Expertise:** Mossé Security has delivered hundreds of technical attack simulations and responded to hundreds of security incidents all over the world. This scope and experience makes us uniquely qualified to offer pertinent and timely security advice to our clients.

BENEFITS:

Rapid Response:

Installing an agreement for incident response services decreases the response time by hours or even days compared with other firms. Mossé Security's security analysts arrive onsite within just a few hours of being called.

In-Depth Analysis:

In-depth digital forensics and reverse engineering analysis breaks down how the threat actors breached your network and even why. This intelligence further informs your company's future security investments.

Reduced Losses:

Rapid incident response limits financial losses and reputational damages. We give business executives a better understanding of the situation and the tools to mitigate additional negative consequences.
