

WIRELESS PENETRATION TESTING

Mossé Security offers Wireless Penetration Testing services to test the security of your wireless networks to identify and exploit discovered vulnerabilities. Contact us today to begin this comprehensive security service.

OVERVIEW

Wireless networks improve the capabilities of your business; however, they do come with many security risks. These risks are due to the fact anyone can connect to the network with a device that finds the networks signal. An insecure wireless network can act as an easy access point to your organisation's network for attackers.

Mossé Security's Certified Consultants complete a Wireless Penetration Test using cutting-edge techniques and a combination of automatic and manual tools to discover vulnerabilities in common areas including software patches, weak access points and misconfiguration of security protocols.

Our Certified Consultants assemble their discoveries in a detailed report which also outlines solutions delineating the required steps to remediate the vulnerabilities. Mossé Security has earned the trust of our customers by over-delivering on each Wireless Penetration Test, and consistently maintaining an impeccable, high standard of work ethics. As a result, our customers call us first to ensure the security of their wireless networks.

MOSSÉ SECURITY

- **Reconnaissance:** Mossé Security's Certified Consultants employ in-depth knowledge and experience acquired from numerous previous Wireless Penetration Tests to further assemble information of your organisations wireless networks. A full and complete understanding of which methodologies real attackers would use against your organisation's target profile is the result you get to see.
- **Vulnerability Analysis:** Mossé Security uses advanced tactics and techniques to discover vulnerabilities presented throughout the wireless network, and provides an analysis of the business risks and any impacts the vulnerability may cause.
- **Exploitation:** Mossé Security Certified Consultants conduct exploits on the discovered vulnerabilities attempting to gain access to the network and gather information from the wireless access points.
- **Comprehensive Reporting:** Mossé Security provides a comprehensively detailed report of their discoveries, which includes any sensitive information our Certified Consultants were able to access.

BENEFITS:

Expertise:

Mossé Security delivers hundreds of Wireless Penetration Tests using realistic techniques threat actors are currently using against organisations with similar target profiles

Wireless Security:

Mossé Security ensures that your organisation is following the best industry practices by implementing the correct security procedures throughout your wireless network

Risk Mitigation:

Mossé Security identifies all of the vulnerabilities in the network allowing your organisation the option to provide immediate remediation to reduce the attack surface
